

Fiber Termination Box

BSSP-1601-2A

Compact Fiber Termination & Organization

A compact fiber termination enclosure designed to support organized fiber connection and management within structured access and distribution environments. The BSSP-1601-2A provides a clean housing format for project-specific fiber termination requirements.

BSSP-1601-2A

Product model

TERMINATION BOX

Enclosure format

FIBER MANAGEMENT

Structured organization

Designed for clean fiber termination and organized access-network integration.

PRODUCT OVERVIEW

Compact termination.
Configured around your project.

A concise overview based on the confirmed product name, model and enclosure format.

PRODUCT TYPE	Fiber Termination Box
MODEL	BSSP-1601-2A
PRIMARY FUNCTION	Fiber termination and connection organization
FORMAT	Compact fiber enclosure
PROJECT APPROACH	Configuration aligned with connectivity and installation requirements

CONFIGURED AROUND YOUR PROJECT

Berth Solutions can review connector, fiber routing and installation requirements according to the architecture of each deployment. This project-driven approach helps align the termination box configuration with the customer's connection, organization and access needs.

PROJECT-DRIVEN APPROACH

The objective is to provide a clean and practical fiber termination point that supports organized connectivity and straightforward integration into structured fiber access environments.

WHERE THIS SOLUTION FITS

Designed for structured fiber termination points.

A compact enclosure format for organized fiber termination, access and distribution environments.

01

Fiber Access Networks

Supports organized termination and connection points within structured fiber access infrastructure.

02

FTTx Deployments

Provides a compact enclosure format for fiber termination within access-network deployments.

03

Distribution Systems

Helps centralize and organize fiber connections within structured distribution environments.

04

Project-Specific Integration

Connector, routing and installation requirements can be aligned with the needs of each deployment.
